

Elvis Noko Kgomo

Full-Stack Developer | Software Development Graduate

Elvisnoko18@gmail.com | (+27) 76 492 3096 | [Github](#) | [Linkedin](#) | [Personal Website](#) | Polokwane, Limpopo 0700

WORK EXPERIENCE

Full-Stack Developer

Moepi Publishing | Apr 2025 – Present (2 months) | Pretoria, Gauteng (Remote)

- Developing and maintaining Tekete application and digital solutions for publishing.
- Collaborating with remote teams to improve system performance and deployment.
- Assisting in front-end and back-end development tasks.
- Collaborating with remote teams to improve system performance and deployment.

Software Developer Intern

Cognifyz Technologies | Nov 2024 – March 2025 (5 months) | Polokwane, Limpopo (Remote)

- Built and improved a task-tracking application with persistent storage using file I/O operations.
- Integrated data scraping capabilities to extract and display web content.
- Delivered modular code for backend logic and file-based task management.

Web Developer Intern

HexSoftware | Oct 2024 – Nov 2024 (4 months) | Polokwane, Limpopo (Remote)

- Designed and developed a responsive web application using Vanilla JavaScript.
- Implemented interactive features including dynamic playlists and media controls for seamless playback.
- Optimized the application for cross-device compatibility and a smooth user experience.

End User Computing Technician Intern

Pietersburg Hospital | Jan 2024 – Dec 2024 | Polokwane, South Africa

- Assisted users by installing and configuring Health systems (eHIS, IBA and RX).
- Helped deploy and configure desktops, laptops and printers.
- Assisted with user account management tasks such as account creation, password resets, and access permissions.
- Troubleshooting and installing transversal systems (BlueZone, Baud, Bas and Logis).
- Provided first and second level LAN and desktop support.

EDUCATION

National Diploma in IT (Software Development)

Tshwane University of Technology | Jan 2019 – Oct 2024 | Polokwane, South Africa

- Completed coursework in programming, database design, and software development, excelling in both theoretical and practical applications.
- Engaged in hands-on projects, including Health-Linker project which applied OOP principles in Java.
- Certifications: Red Hat Certified System Administrator (RHCSA), Cisco Networking Basic

PROJECTS

Health Linker | [Link](#)

- Developed a Spring Boot healthcare application using OOP principles in Java.
- Designed to provide patients with secure access to their medical records, ensuring data privacy and userfriendly navigation.

Salamance | [Link](#)

- Collaborating with [Mathias Rumler](#)(33M), built to monitor and archive Dota Matches, allow for storage and analysis.
- My attention is on Angular-based frontend and some logic & convenience features on microservice.

Movie Application | [Link](#)

- A React application that allows users to search for movies using OMDb API.
- It features searching movies by titles, displaying search results in card format and show message when movies aren't found

SKILLS

Programming Languages: JavaScript, TypeScript, Java, HTML/CSS, C++, MYSQL, PHP, C#, Bash

Libraries & Frameworks: React, Angular, Node.js, Express.js, Tailwind CSS, Spring Boot, Vue, Next.js, Laravel

Tools & Technologies: Git, Linux, MongoDB, Firebase, JSON, MS Office, Figma, Command line, Docker, Wordpress, AI

Methodologies: Agile, SDLC, CI/CD, Frontend & Backend development

EXTRACURRICULAR

Mobile developer

Tshwane University of Technology | Jul 2023 – Dec 2023

- Collaborated with a team of five to implement SDLC methodologies and develop a functional mobile application.
- Gained experience in coding, UI/UX design, backend integration, and project management.
- Emphasized teamwork, problem-solving, and applying theoretical knowledge to real-world scenarios.
